

Call for Technical Papers / Seminar Request

The Canadian CommTech Show & Seminars is seeking proposals for technical seminars and workshops to be offered during the 2012 Kelowna show, Wednesday May 16 and Thursday May 17.

20 SEMINAR SLOTS AVAILABLE

PROPOSALS DUE BY: December 15, 2011

To be considered for a Seminar time slot, please complete the form below and submit a digital copy or outline of your presentation(s) to Linda Guzman at: info@commtechshow.com (please request read receipt).

20 seminar time slots are available. Consideration is given to timely, diverse and factual topics of interest to the majority of attendees or individual segments like wireless, cable or Telco. You are welcome to submit more than one proposal for consideration. New topics for smaller niche audiences i.e., planners, engineers, trouble-shooters, QC etc. are needed as well. There will be two large seminar rooms and one smaller room for more niche topics.

Seminars spots are available both days and topics need to concentrate on introduction, application and training aspects. Each speaker is allotted 45-minutes followed by a 5-minute Q&A period. Additional questioning from clients can be directed to your host exhibitor table for further discussion.

All applications will be presented to an industry advisory committee for review and rated by popularity and content. Seminar speakers are to provide a presentation that is not brand specific, the representing exhibitor or sponsoring company can be mentioned in the introduction and at the end. Speakers need to have excellent presentation skills, extensive product knowledge and be well spoken in the English language. Three seminar rooms provided are equipped with a podium and microphone, an 8 ft screen and projector. You will need to supply your own computer. We are looking for suggestions for a 2-hour think tank/forum on Day 2 with prominent panel speakers.

POTENTIAL SEMINAR AUDIENCE: Attendees may be involved with the purchasing, operations, safety, design, planning, deployment, construction, networking or maintenance of hardware, software and/or test equipment, particularly for COs, headends, outside plant and contracting personnel. The show draws from telephone, cable, contractor, wireless, utility, municipal and educational institutions.

The key contact will be notified with results by January 31, 2012, once the advisory board has made recommendations. Selected seminars will require a seminar description of 225 words or less for print in the Show Program, as well as a max. 50 word bio for introduction of the speaker. A digital version of the presentation is required for posting on our website following the show -- access is provided to Attendees only.

PROPOSED SEMINAR TOPIC:

Seminar Description for Advisory Board: *(please ensure this is filled in so we understand your proposed topic clearly):*
